

WaterRows

GRAPHENE CERAMIC POOLS®

#NEXTGENERATIONPOOLS

were created with a clear ambition:
to build pools that move the industry forward.

Behind WaterRows stands more than 26 years of experience in pool manufacturing — combined with a decision not to repeat what already exists. From the beginning, we chose to go further.

PEOPLE

We share one vision — to create pool
that set a new standard for quality and innovation.

DESIGN

Clean forms, balanced proportions
and integrated relaxation zones.

TECHNOLOGY

WaterRows Graphene Ceramic Pools®, integrated LED lighting
and precision CNC production create a pool built
for performance and durability.

COLORS

Carefully developed color tones create depth,
reflection and a natural harmony with the surrounding space.

EXPERIENCE

A WaterRows pool is more than a product.
It is a place for movement, relaxation and moments that shape everyday life.

NEW BRAND, WELL-KNOWN PEOPLE

We are the team behind one of the most successful pool factories in Europe. Today, we're building something new — bolder, more focused, more refined. WaterRows is our shared vision for a new generation of pools.

Made with experience. Driven by design.

Our motivation is our experience

Miroslav Ruziak Managing Director

"Vision and the right people will take you beyond boundaries."

Over 26 years of experience in the pool business. He founded and ran a successful ceramic swimming pool factory in Slovakia, Compass Europe. He has experience in selling swimming pools in 27 countries worldwide.

Linda Lackovicova Head of Marketing & Sales

"This brand is built to challenge what pool design. WaterRows isn't just a product. It's a statement."

10+ years of experience in the swimming pool segment as CMO and international sales for Compass Europe. More than 23 years of experience in managerial positions in marketing, branding, PR and strategy.

Ivan Gata Head of Finance

"I've spent my career in finance. I've seen hundreds of projects. But very few combine deep know-how, premium positioning, and a real market gap. WaterRows is one of them. That's why I invested — not in pools, but in people who know exactly what they're doing."

Strategic investor of the project with extensive experience in the financial sector.

Andrej Deglovic Head of Production

"More than 20 years ago, I went to Australia to learn how to build ceramic pools. I've been in production ever since — every day, every detail. I know what makes the difference between a pool and the pool. Production is not routine. It's precision that counts."

Expert in the production of ceramic swimming pools with more than 20 years of experience. Professional in setting up and optimizing production, selecting suitable materials and suppliers.

MX 5 - OUR INNOVATIVE HEART

We manufacture the moulds in-house, which means we have full control over the entire process - from the design to the final production of each individual mould. The CNC mill allows us to creatively design the unique shapes and lines of our pools. With this machine, we are introducing one of our most significant pool innovations - integrated LED lighting directly into the body of the pool.

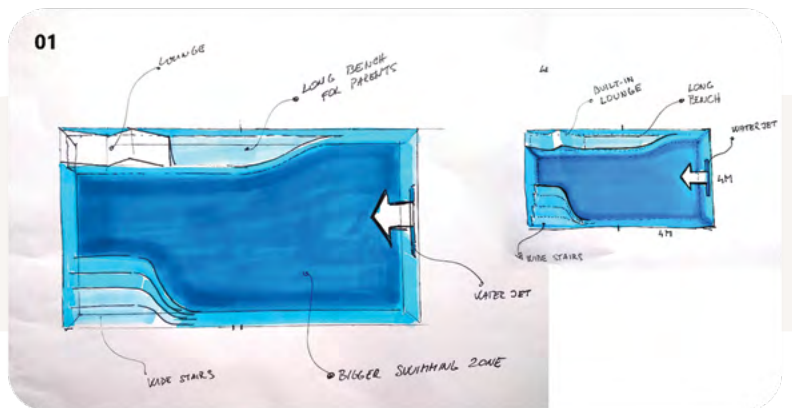

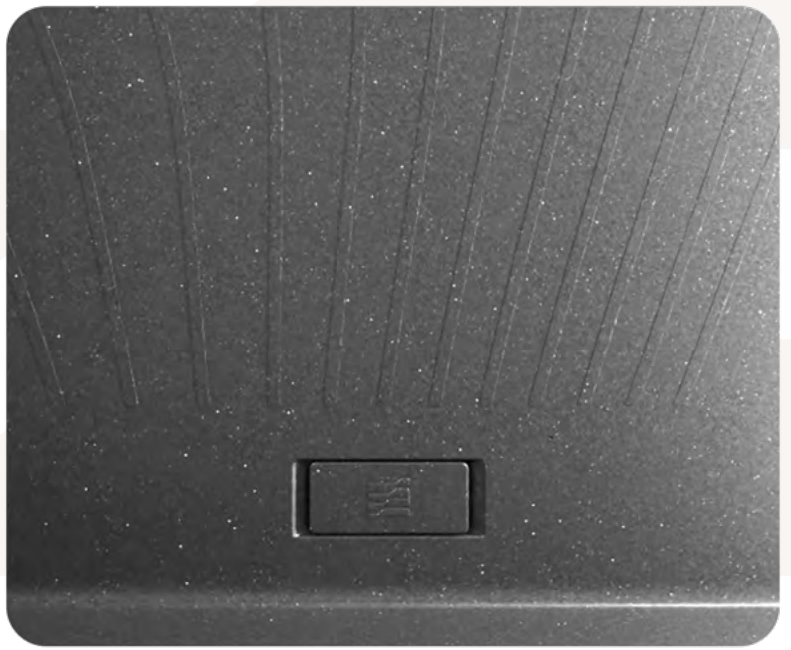

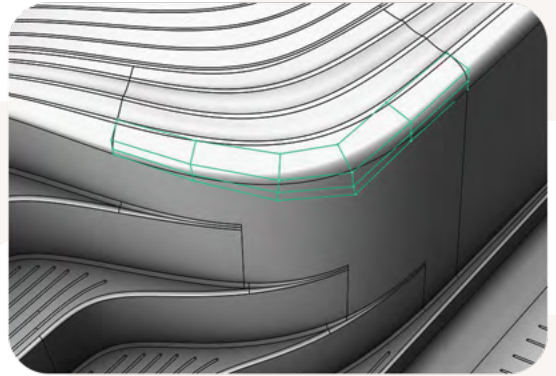

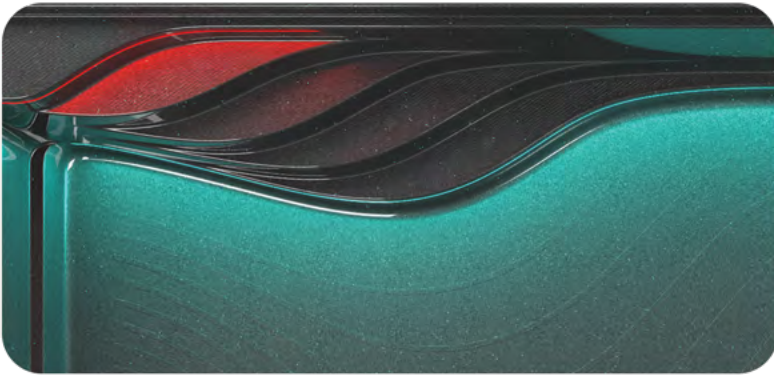

MX5

O
F

Inhouse CNC machine MX5 – the potential of unlimited possibilities

The production of customised moulds plays a key role in the success of pool manufacturing.

We are the first pool factory in the world to introduce a full 5-axis milling machine for model production. With the MX5, our moulds are accurate, have timeless designs and are produced quickly with efficient material consumption.

WE RE A TH S

Design isn't the
final touch. It's the
starting point.

At WaterRows, every pool begins with design — not just in form, but in experience.

We don't follow trends. We shape environments. Design defines how the pool lives in space. Design defines how the pool makes you feel. That's why it's not just important — it's everything. Our forms are clean, bold, and essential — guided by symmetry, balance, and precise proportions.

Each curve is shaped down to the millimetre by the heart of our innovation: the MX5 CNC system. Inspired by boat and yacht building, our production setup is unique in the composite pool industry — created to deliver perfect form, every time.

ORGANIC Single 78
Antique Alabaster

SLIDERS

Designed for living. Engineered for decades.

WaterRows pools combine modern design, advanced technology and more than 26 years of experience in pool manufacturing. Each model is designed to naturally integrate into the architecture of the garden while providing maximum comfort for both swimming and relaxation.

Thanks to Graphene Ceramic technology, integrated LED lighting and precision manufacturing, WaterRows pools represent a new generation of composite pools.

Integrated LED lighting - breathtaking atmosphere

Where light meets design.
There is lighting.

And then there is light that becomes part of the pool itself. We are the only composite pool manufacturer with fully integrated LED lighting — seamlessly embedded into the shell, enhancing every curve, guiding the eye, and opening a new visual dimension.

It's not just illumination.
It's an experience.
The sky darkens.
The air softens.
Your pool awakens.
Light shimmers beneath the surface — calm, quiet, alive.
Night begins in color.
Crafted exclusively for our pool lines.
Unforgettable by day and night.

Developed in exclusive
cooperation with

leditaly.com

INTEGRATED LED LIGHTING AS A PART OF THE POOL STRUCTURE

LED LIGHTING

Is integrated into the pool structure already during production.

INTEGRATED INTO THE POOL WALL

The LED strip is integrated into the pool wall so that it is flush with the surface, creating a clean, sleek design. It can be replaced at any time during the pool's lifespan.

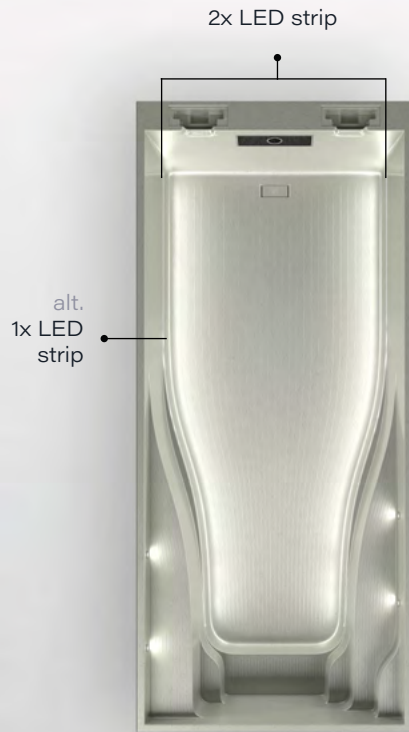

CREATES IMMERSIVE ATMOSPHERE

The soft, linear glow transforms your pool into a living space - perfect for evening relaxation or stylish entertaining.

ENGINEERED FOR LONGEVITY

Developed with CNC precision and in collaboration with LED ITALY to ensure long-term durability in underwater conditions.

COLOR

Every color tells a story. Our palette is more than a design choice — it's an emotional layer of your pool. From soft minerals to vivid reflections and sparkles, each finish responds to light, time, and water.

Crafted to elevate outdoor spaces with timeless elegance— for those who see the pool as architecture, not just a product.

HIGHLIGHT OF THE SEASON 2026

Our gelcoat technology is backed by over 20 years of real-world performance. It provides exceptional resistance to chemicals, UV radiation, and weather conditions — ensuring WaterRows pools retain their color and surface integrity over time. Designed to endure. Built to stay beautiful.

HIGHFLOW INTEGRATED SKIMMER

The WaterRows skimmer is already an integral part of the pool shell—designed and built in during manufacturing.

For you, this means easier and faster installation without any additional work, cutting, or on-site modifications.

In addition to the technical advantages, it also makes a significant difference in the overall pool experience. Thanks to this design, the water reaches the maximum possible level, which is naturally higher than in standard pools.

This gives you:

The result?

The water appears to be “stretched” right to the edge, similar to an infinity pool.
